AAFRIN AAYSHA A

Email id: aafrinaaysha@gmail.com | **Linkedin id:** aafrinaaysha

GitHub: github.com/Aafrin-Aaysha | **PortFolio:** https://aafrinaaysha-portfolio.netlify.app/

Ph.No: 7639390868 | Beerangi Tank Street, Trichy, Tamil Nadu, India

Profile

MCA student skilled in Data Structures, Algorithms, and OOP, with experience developing scalable backend, distributed, and full-stack applications using Python, React.js, Node.js, and MongoDB. Strong in REST APIs, system design fundamentals, and building reliable software solutions.

Skills

- **Languages:** Python, Java, JavaScript, C, C++
- **CS Fundamentals:** Data Structures, Algorithms, Object-Oriented Programming (OOP), Complexity Analysis
- **Backend & Web:** React.js, Node.js, Express.js, REST APIs, Authentication, Authorization
- **Databases:** MongoDB, MySQL, SQL, Database Design, Query Optimization
- **Systems & Cloud:** Distributed Systems, Load Balancing, Client-Server Architecture, Docker, AWS (EC2, S3 – basic)
- **AI & Data:** Generative AI, Retrieval-Augmented Generation (RAG), LLM Integration, Data Analysis,
- **Tools:** Git, Postman, Power BI, Tableau, Figma
- **Practices:** Debugging, Testing, Agile Development

Projects

Agentic Honeypot – AI-based Scam Detection System
• Designed and developed an automated honeypot system to simulate vulnerable services and capture malicious activity
• Implemented backend monitoring, logging, and automated interaction modules using Python
• Improved threat detection and analysis through intelligent automation
Tech: Python, REST APIs, Automation, Logging

Load Balancer for College Result Website
• Developed a load balancing system to distribute incoming requests across multiple servers
• Improved system availability and reduced server overload during peak traffic
• Implemented request routing and backend logic using Python
Tech: Python, React, Distributed Systems

Research Paper Analyzer – RAG-based AI Application
• Built a Retrieval-Augmented Generation (RAG) system to analyze and summarize research papers
• Implemented document processing, embedding, and question-answering pipeline
• Developed interactive web interface for querying uploaded documents
Tech: Python, LLM, RAG, Web Application

Restaurant Website – Full Stack Application
• Built a full-stack food ordering application with authentication, cart, and admin dashboard
• Developed REST APIs and integrated MongoDB database
Tech: React.js, Node.js, Express.js, MongoDB

Zubizo – Invitation Stationery Business Website
• Designed and developed a responsive production-level business website
• Implemented backend integration and modern UI design
Tech: React.js, Node.js, MongoDB

Internships

- **Full Stack Development Intern – TechZarInfo, Trichy | May 2025**
  Developed full-stack web applications using React, Node.js, and MongoDB; supported REST API development, testing, and performance optimization.
- **Full Stack Development Intern – ILife Technologies, Trichy | February 2023**
  Designed responsive UI components using HTML, CSS, JavaScript, and React; collaborated with UI/UX teams and received **Best Intern** recognition.

Education

- **Master of Computer Application** - *Bishop Heber College (2024 – 2026)* | CGPA: 8.5
- **B.Sc. Computer Science** - *Jamal Mohamed College, Trichy (2021 – 2024)* | CGPA: 8.8

Certifications

- SAWIT.AI Learnathon - Generative AI Fundamentals – HCL *GUVI, NASSCOM, AICTE, Feb 2026*
- Build Dashboards in Power BI with Python Data – *HCL GUVI, Jan 2026*
- Python Pro Bootcamp Certification - *Oct, 2025*
- Full Stack Development Certification - *May 2025*
- Database Management Systems - *NPTEL, 2025*

Achievements

- **Top 2% National Finalist** – India AI Impact Buildathon (40,000+ participants)
- **Best Intern Award** - ILife Technologies
